

E-Migration Assist — Admin Portal v2 (proposed)

Visual mockup of the redesigned marketing / sales-ops admin portal that maps to the three-segment funnel (Individual · Overstay · Business). This is a static visualisation — not the live build — to align on layout before Joshua wires it. Annotations in 1 highlight the new surfaces.

1. Inbox view — all leads, all segments

The default screen the marketing team opens at the start of the day.

Legend:

1

4-segment toggle replaces 2-segment

2

Stackable filter chips with active

3

Segment tag + 1-line scenario in same
column

4

Score ring + tier pill (per segment)

5

Traffic-light SLA + due

Layout note — Drawer opens on row-click and replaces the right-hand column. Segment-aware drawer schema: Individual shows visa fields, Overstay shows triage + outcome, Business shows pain answers + caseload.

2. New surfaces vs the current portal

Mapped against the live admin in your screen recording (Mon 22 Jun) – what is new, what is changed, what is removed.

- 4-segment toggle.** Replaces the current 2-segment toggle (Individual / Reference). New tabs: All · Individual · Overstay · Business. Each shows a live count and a coloured dot. The Overstay tab carries an alert pill when any Critical lead is pending.
 - Stackable filter chips.** Replaces the single-row filter strip. Active chips render in teal and show an × to clear. Owner, source, country, score, age — all stackable. The SLA traffic-light key sits inline on the right.
 - Scenario column.** Currently the lead table shows visa type as a one-liner. v2 shows a coloured segment tag plus a one-sentence scenario so the team can route at-a-glance without opening the drawer.
 - Score ring + tier pill.** Each lead has a per-segment 0-100 score with a coloured tier label. Individual uses Hot / Warm / Cool / Cold. Overstay uses Critical / Urgent / Standard. Business uses Strategic / Qualified / Nurture / Disqualified.
 - SLA traffic light.** Red dot = breached, amber = within 30 minutes of breach, green = on track. The countdown timer and due-time replace the current “time created” column which never told the team if action was overdue.
 - Drawer adapts per segment.** The right-hand drawer changes its first section based on segment: Overstay opens with Urgency Triage, Business opens with Pain Answers, Individual opens with Visa Snapshot. The verbatim five pain-point answers from the Business funnel render as cards.
 - Routing recommendation block.** System-suggested SLA, owner pool, and dispatch state (Telegram alert sent / acknowledged / unacknowledged). One-click escalate-to-partner button on Critical Overstay leads.
 - ⌘K command palette.** Type to search any lead by name, reference, country, scenario. Currently absent — the team is using the browser-level Ctrl-F.
 - Critical alert banner.** When a Critical Overstay lead sits unowned, a top-of-page red banner appears with one-click Assign & Call. Replaces the silent queue today.
 - KPI strip.** Four operational counters — Overdue SLA, Hot, New today, In progress — replace the current “leads / overstay” tiles. These drive the team’s daily attention.

3. Business-segment lead drawer (variant)

The same drawer geometry, opened on a Business lead — the first section becomes the verbatim pain-point answers.

Drawer · Sipho Patel · Business · Strategic

DRAWER VARIANT B

VERBATIM PAIN ANSWERS (5 OF 5 CAPTURED)

Time spent chasing clients for missing documents
15 hours / week — admin handles 90% of follow-ups · staff burnout rated 8/10 · already considering an automation tool

Delays / complaints / risks from missing or outdated documents
2 client complaints last month · 1 application rejected for outdated medical · QC rework on 6 cases · concerned about reputation

If caseload doubled, could you handle it
No — would need to hire 2 consultants · revenue ceiling sits around R450k / month at current capacity

Status visibility on every active case
Spreadsheet + memory · no central view · cannot answer status questions without opening 4 tools

Process consistency across consultants
Inconsistent — 3 consultants, 3 different intake forms · training takes 4-6 weeks · QA failures 1 in 10 cases

 Move to Nurture

DISCOVERY (POST-CONVERSION)

Tools-stack · compliance · revenue questions are *not* on the public funnel. They surface here for the rep to ask during the demo call once Sipho has booked.

Why this drawer matters —

Tebatso's review said "focus on the pains". The Business drawer leads with verbatim pain answers, then firm profile, then a clearly scoped next action. Discovery questions (tools, compliance, revenue) are explicitly deferred to the demo call.

4. Overstay-segment lead drawer (variant)

Urgency-first layout. The colour palette shifts red — the rep must know in 1 second how dangerous this lead's situation is.

Re-trigger Telegram alert

Why this drawer matters — Overstay is the highest revenue-per-lead segment we are currently mis-handling. A Critical lead must trigger partner contact, not the standard intake. The escalation status block tells the rep whether the partner has acknowledged the alert — replaces the silent Telegram channel.

5. What changes vs the live portal

One-page summary of every visible delta — for Joshua to plan against.

SURFACE	TODAY (LIVE)	PROPOSED V2	OWNER
Segment toggle	2 pills · Individual / Reference	4 pills · All / Individual / Overstay / Business · live counts · alert pill on Overstay	Joshua
Lead table	2 stacked tables · no SLA · no score · no scenario	Single table · score ring · tier pill · SLA traffic-light · scenario tag · per-segment colour	Joshua
Top-bar search	None (browser Ctrl-F only)	⌘K palette · search across name, ref, country, scenario, phone	Joshua
KPI strip	2 tiles · leads / reference	4 tiles · Overdue / Hot / New today / In progress · colour-coded	Joshua
Filter bar	Single-row inline filters	Stackable chip system · active state · clear-X · SLA legend inline	Joshua
Lead drawer	Not present — leads open as full pages	Right-edge drawer · segment-aware first section · 5 tabs · sticky footer actions	Joshua
Critical alert banner	None	Top-of-inbox red banner · auto-shows when Critical Overstay sits unowned · one-click assign & call	Joshua
Pain-point capture	N/A — no Business flow	Verbatim 5-answer card stack in Business drawer · "hot" border when score signal is high	Joshua
Telegram escalation status	Outbound only · no read-back	Drawer shows "sent / read / acknowledged" with one-click re-trigger	Joshua
Post-conversion discovery	N/A	Separate drawer section for the rep — tools, compliance, revenue questions reserved for the demo call	Joshua
